

SHOW US YOUR SKILLS

We loved you in the interview and now it’s time to show your skills. We would like to see if you can build the following app (or web-app) to track the best ice cream places in town. We don’t expect everything to be perfect, but rather look at how you tackle the problems.

Its your choice to create the screens as web-application (react) or smartphone app (react native).

Create „start“-page:

- Add hero-component (see below) without padding on sides
- Add padding to content (cards + buttons) on all sides: 20px
- Add „Add location“-button component (see below)
- Add Card component, for each location the user creates

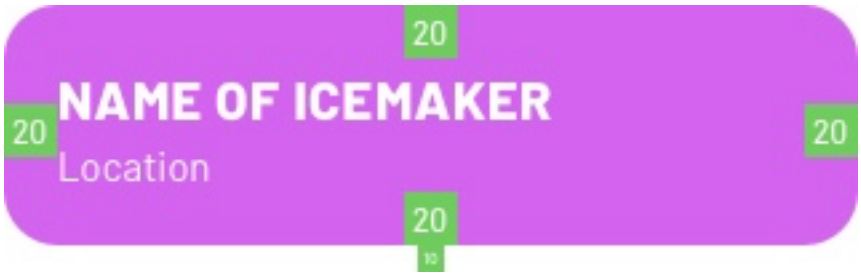

Create hero component:

- 240px height
- contains a centered headline

Hero-Text styling:

- Font: „Barlow“ (attached)
- Weight: Extrabold
- Position: Centered
- Size: 25px
- Letter-spacing: 0.5px
- Uppercase
- Padding on both sides: 20px

Create card component:

- Color: #D463F0
- Contains Textbox for „Name of Icemaker“
- Contains Textbox for „Location“
- Text-Container has padding of: 20px

„Name of Icemaker“ styling:

- Font: „Barlow“ (attached)
- Weight: Extrabold
- Size: 20px
- Lineheight: 30px
- Letter-spacing: 0.5px
- Uppercase

„Location“ styling:

- Font: „Barlow“ (attached)
- Weight: Regular
- Size: 15px
- Lineheight: 20px

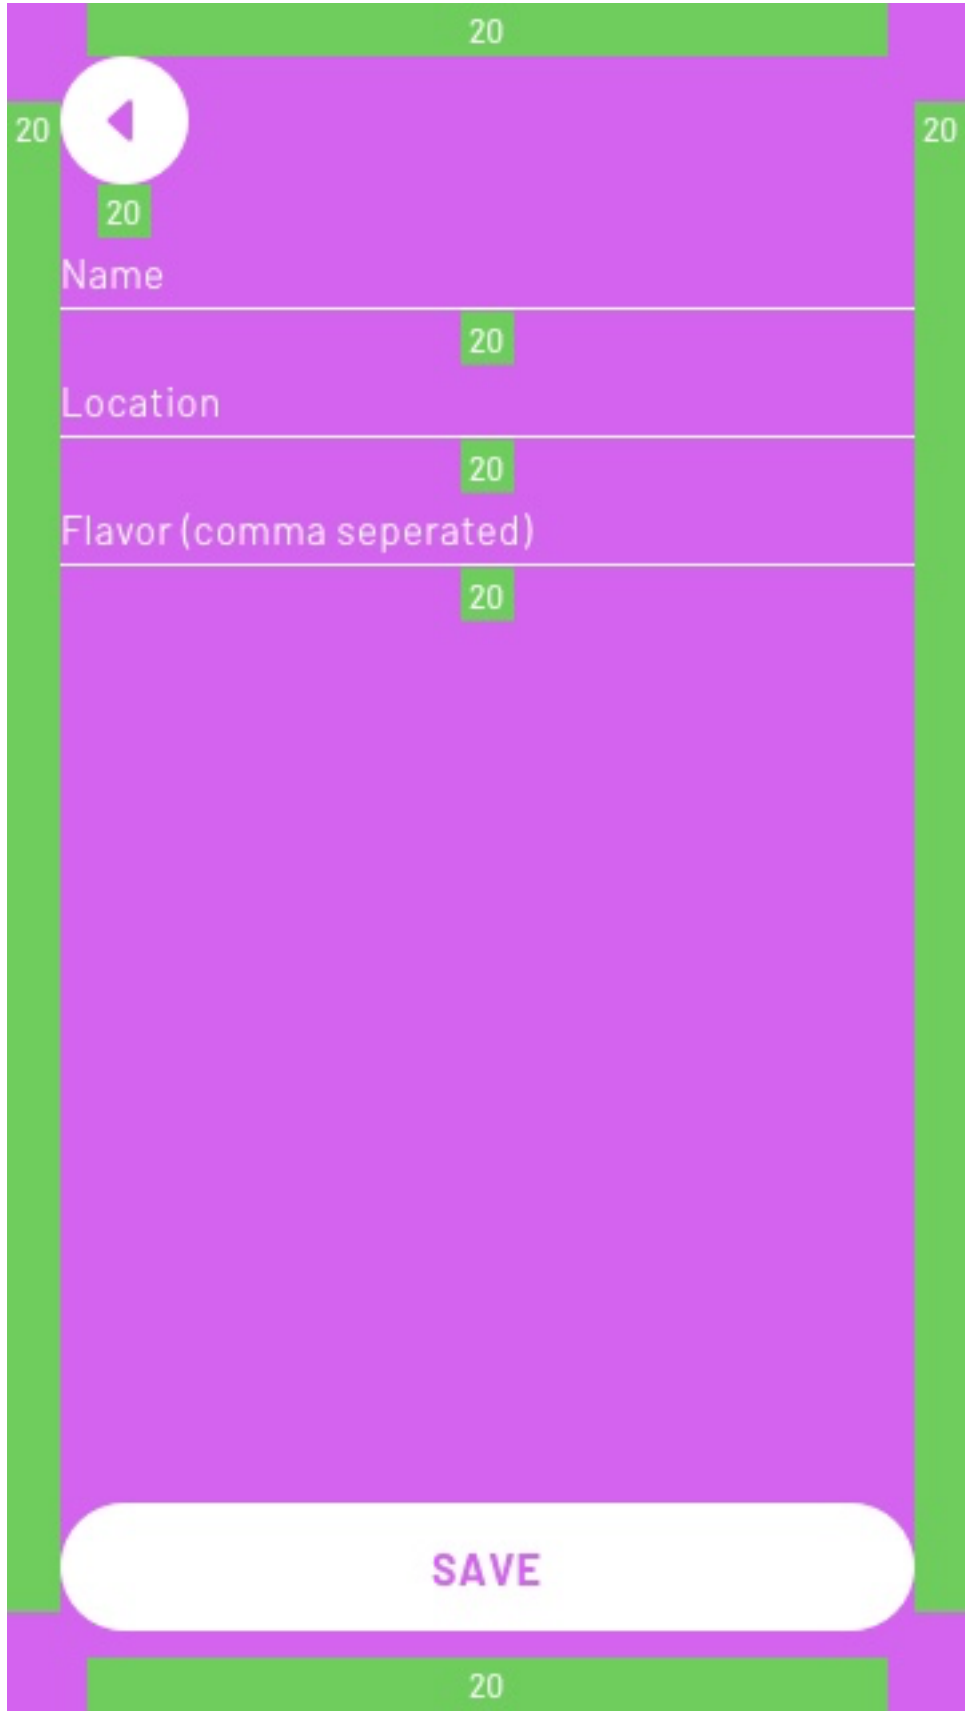

Create button component:

- Color: #49DCFF
- Contains centered Textbox for „Add location“-Text
- Button height: 48px
- Padding on bottom: 10px

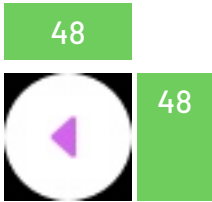

Button text styling:

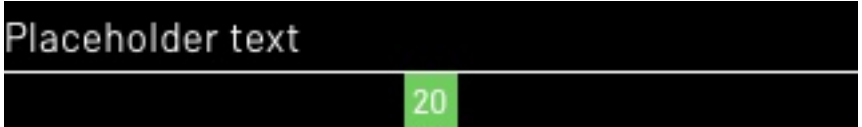

- Font: „Barlow“ (attached)
- Weight: Extrabold
- Size: 15px
- Lineheight: 20px
- Letter-spacing: 0.5px
- Uppercase
- Padding on sides: 20px

Create AddLocation screen:
- Background color: #D463F0
- Add padding on all sides: 20px

Create back icon-button component:
- size: 48x48 px
- Add icon-asset (attached)
- Position on top left
- Add padding bottom: 20px

Create input field-component:
- Add textbox with placeholder-text.
- Empty textbox when clicking inside
- Add padding bottom: 20px

- Add input field for Name
- Add input field for location
- Add input field for Sort and allow multiple
 entrys seperated by comma
(these will be shown on detail-page as list)

Create button component:
- Same properties like „button_blue“
- But different color

Create detail page:

This screen is shown when user clicks on created card.

- Add content as shown
